Linen (Flax) premium fabrics:100-200 GSM.

Linen is a beautiful everyday fabric. It is free from impurities and is highly moisture absorbent. It removes perspiration from the skin and gives a cooling effect to the body.

It is one of the few fabrics that have great breakage strength. Since linen is a natural vegetable fiber, it is extremely comfortable. It is also stronger than cotton.

Bamboo fabric:100-200 GSM:

Cotton premium fabrics:100-200 GSM.

Natural bamboo fiber textile is extracted directly different from bamboo viscose, which is produced by chemical processing. The bamboo fabric we offer does not contain any chemical additives.

It has unique properties and hence can be used for a wide range of applications. Because of its special structure and natural "hollowness" in the horizontal cross sections, the abundant gaps in the fiber can absorb and evaporate the moisture of human skin instantly.

Applications

Used to weave light fabrics. The bedding made by bamboo fibre has an excellent performance in the field of breathability and permeability which makes it more suitable to be used in home textiles. It is also used to make industrial textiles.

Features

- Antibacterial, deodorant, coloration, elasticity, drape-ability and wear-ability characteristics
- It is free from chemical additives
- It quickly absorbs and evaporates moisture
- Skin-friendly fabric
- High strength

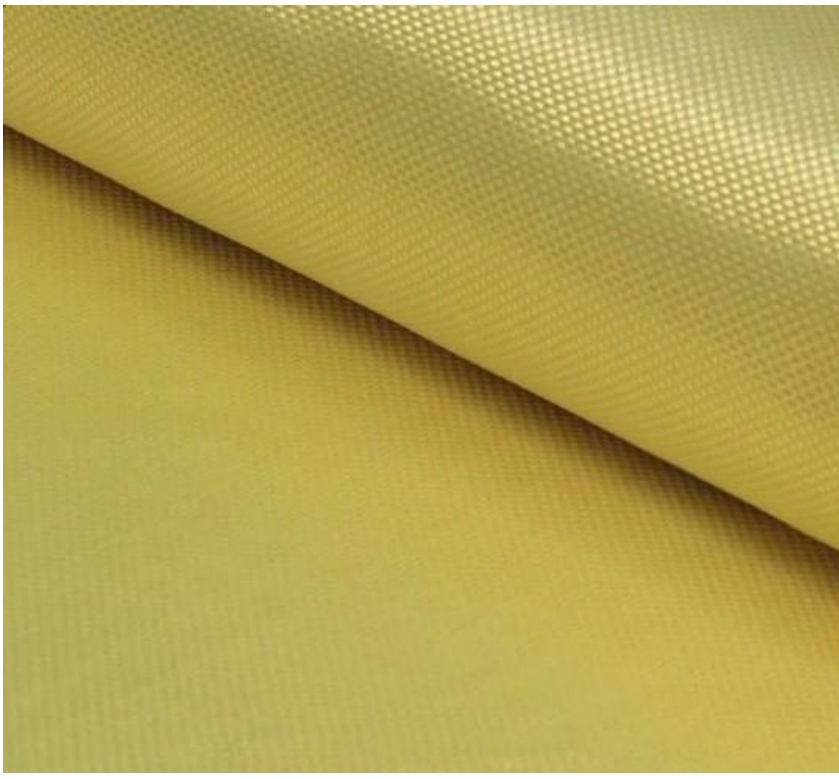

- Long elongation of breakage

Bottom fabrics Specifications

- 20 BAMBOO X 20 BAMBOO/ 60 X 60/ 63* 1/1 PLAIN
- 30 BAMBOO X 30 BAMBOO/ 68 X 68/ 63* 1/1 PLAIN

Technical textile fabrics.100-700 GSM.

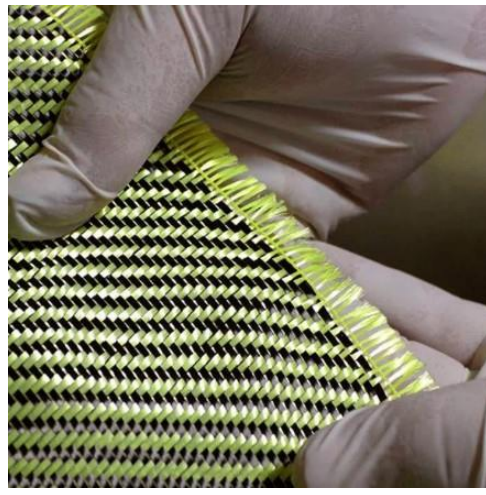

1.Aramid fiber fabric.(meta and para).

2. Carbon fiber fabric: 200-600GSM.

a. Twill Hybrid Carbon Kevlar Fibre Fabric: 200 GSM

3. Glass /silicon fiber fabrics.200-600 GSM.

5. FR (Fire Retardant Cloth).

4. ESD Anti Static Fabrics:-poly corb-98:2.

***TECHNICAL FABRIC R&D...**

We are a leading manufacturer unit in Technical Textiles.

(Medi,Agro,Industrial,Automotive,Clothtech textiles), jute and cotton blended JUCO, bamboo and linen premium fabrics. We are pioneers in the weaving process.
